EDUCATION

- 2023 - 2027
- MAHENDRA ENGINEERING COLLEGE
- B. Tech(AI&DS)
- CGPA: 8.06/10

- 2021-2023
- SRI VENKATESHWARA JUNIOR COLLEGE
- MPC
- Marks : 80%

TECHNICAL SKILLS

- Programming Languages: Java(Basics), Python,
- Web Technologies: HTML, CSS, JavaScript(Basics)
- Database: MySQL, SQL Basics
- Python Libraries: NumPy, Pandas, Matplotlib, Scikit-learn
- Machine Learning: Linear Regression, Logistic Regression, Decision Tree, Random Forest, K-Means Clustering, K-Nearest Neighbors (KNN)
- Deep Learning: Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN), Recurrent Neural Networks (RNN), LSTM
- Core Concepts: OOP Basics, AI/ML Fundamentals
- Tools: GitHub, VS Code

PROFESSIONAL SUMMARY

Motivated and detail-oriented B.Tech Artificial Intelligence and Data Science student with strong knowledge of Java, Python, SQL, Machine Learning, and Deep Learning. Skilled in developing AI- and IoT-based applications, with hands-on experience in NumPy, Pandas, Matplotlib, Scikit-learn, MySQL, and IoT technologies. Experienced in developing innovative projects including V2X traffic safety, online exam malpractice detection, and smart agricultural robotics with blockchain-based crop traceability. Quick learner with strong problem-solving abilities and a passion for applying emerging technologies to real-world challenges.

PROJECTS

- AI-Enabled Adaptive Silent V2X Alert System for Traffic Noise Reduction**
 - Develop an AI-based silent vehicle alert system using ESP32, GPS, ultrasonic sensors, and V2X communication to reduce traffic noise and improve road safety.
 - Provide real-time vibration alerts and IoT monitoring for smart, efficient, and noise-free transportation.
- AI & IoT Based Malpractice and Cheating Detection System for Online Exams**
 - Developed an AI and IoT-based online exam monitoring system using Flask, ESP32, ESP32-CAM, PIR, and sound sensors to detect cheating activities in real time.
 - Implemented student/admin login, live monitoring, and automatic cheating alerts with database integration using SQLite/MySQL.
- AI-Powered Smart Agricultural Robot with Robotic Harvesting and Blockchain Crop Traceability**
 - Develop and maintain strong relationships with partners, agencies, and vendors to support marketing initiatives.
 - Monitor and maintain brand consistency across all marketing channels and materials. Develop an AI-powered smart agricultural robot to monitor crops, soil, and environmental conditions in real time.
 - Detect crop diseases, weeds, pests, animals, and human intrusions using AI and computer vision.
 - Provide real-time alerts and robot status updates to the farmer through a mobile application.
- DevSphere - Interactive Personal Portfolio & Developer Showcase**
 - Designed and developed a responsive personal portfolio website to showcase professional profile, technical skills, projects, and achievements.
 - Created a modern and interactive user interface using HTML5 and CSS3.
 - Implemented basic JavaScript functionality to enhance user interaction and dynamic page behavior.
 - Structured the website with responsive layouts for an improved experience across different screen sizes.
